# viedoc me™

Reliable ePRO / eCOA solution for engaging data collection
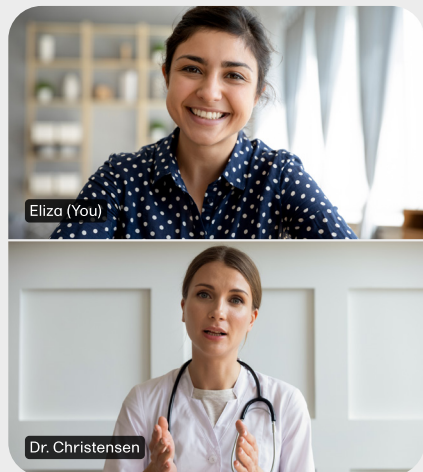

viedoc me ™

Reliable data collection, directly from the source

Viedoc Me is our fully integrated ePRO / eCOA solution for smarter, faster, more engaging data collection. Choose whichever collection method suits you best – in-person, remote, or both. Subjects can use Viedoc Me to report their own data via their smartphones, tablet, or computer, for maximum flexibility. Meanwhile, sponsors and sites have access to a complete, real-time overview of how patients are progressing through their trial.

Auto-reminders

Set up automatic reminders via SMS or e-mail to ensure that relevant data is reported within the designated time frame.

Faster, more accurate data

Data collected directly from the subjects themselves eliminates the need for data entry by site staff, as well as the risk of transcription errors.

Integrated solution

When setting up a form in Viedoc, choose whether you want to post it to the subject or make it part of the regular CRF. Being able to set up both the CRF and the subject questionnaires simultaneously saves you valuable time.

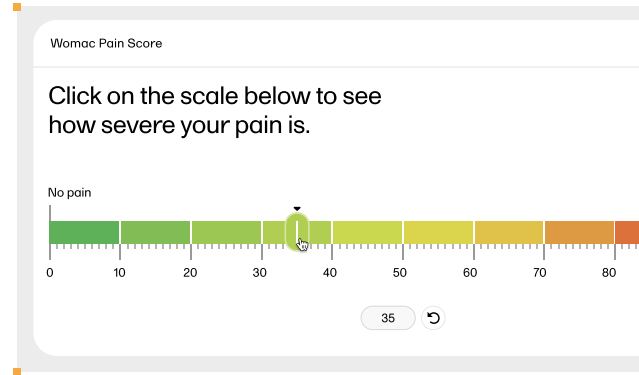

File upload

Subjects submit image documentation directly from their smartphones. With cameras now standard in all mobile devices, Viedoc Me's file upload feature makes image data capture quicker and easier for everyone.

Participant Satisfaction   2/5

Please take a photo of the target area and upload it here.

Customizable scales

In addition to standard data fields, Viedoc Me also features a customizable visual analog scale (VAS), compliant with EQ-5D (www.euroqol.org). Configure it to be displayed horizontally, vertically, with / without coloring or numbers – as a classic VAS, or according to your own preferences.

Womac Pain Score

Click on the scale below to see how severe your pain is.
